Welcome to PDF Viewer

PDF Viewer is designed to offer an immersive document reading mode while still providing quick access to tools and settings. Tapping a document once will switch between reading and tool modes.

The Toolbar at the top provides access to navigation and editing tools, with the Document Tabs — used to switch between all open documents — located directly below.

At the very bottom, you'll see the Page Scrubber Bar, which offers you a quick way of scrolling through a document.

When you enter annotation mode, a sidebar with annotation tools will show up. You can drag the Annotations Toolbar around to dock it to the left, top, or right edge of the screen.

The Toolbar

First, let's have a look at the icons in the Toolbar:

Viewer Settings is where you can change the look and feel of PDF Viewer, including scroll modes, page transitions, and the appearance.

The **System Share Menu** sends documents to other apps, a printer, or your other devices.

The **Annotation Editor** opens the Annotations Sidebar and displays all the available annotation tools.

The **Bookmark Action** adds or removes a bookmark for the current page.

Search helps you find text inside a document or its annotations.

The **Document Overview** holds a list of bookmarks, annotations, and other file information.

Thumbnail View Mode shows a grid of a document's pages and provides access to the Document Editor.
